Jesus Perez – Full Stack Developer

Phone: 831-596-7518| Email: jesup032v@gmail.com| LinkedIn: linkedin.com/in/jesusmperez/

Results oriented Software Engineer with 6+ years of experience in full stack web development, system optimization, test engineering, quality assurance, and cloud-based systems. Skilled in evaluating, configuring, debugging, and maintaining secure, high-performing technology systems across enterprise environments. Experienced in requirements analysis, system design, and the full software development lifecycle (SDLC), with strong expertise in automation, testing, and system optimization. Proven track record of modernizing legacy platforms, migrating monolithic applications, and building reliable software solutions that improve operational efficiency through high quality code, structured testing, and cross functional collaboration.

TECHNICAL SKILLS

Programming Languages: *Java, C++, JavaScript, Python, Groovy*
Frameworks & Libraries: *Selenium, TestNG, Junit, Jest, PostgreSQL, Express.js, React, Node.js, Spring Boot, Redux, GraphQL, Typescript, SQL*
Cloud & DevOps: *AWS (EC2, RDS), CI/CD Pipelines, Docker, Kubernetes, Secure API Development & Integration, Postman, Splunk, Jenkins*
Core Competencies: *Test Automation & Engineering, Quality Assurance, Full Stack Development, Database Management, Data Structures, Object Oriented Programming, Agile Development & Team Collaboration, Unit, Integration & E2E Testing, Debugging & Root cause analysis, Systems Analysis & Design, Security & Data Integrity Practices, Technical Documentation & Requirements Analysis, AI assisted Development.*

EXPERIENCE

Technical Instructor (Full Stack) | CodePath in collaboration with Meta | March 2025 – July 2025

- Guided 32 engineers through hands-on software development projects, emphasizing system design, debugging strategies, and test-driven development practices.
- Integrated industry aligned methodologies such as Git based version control, RESTful API design, and Agile development to bridge the gap between academic learning and professional application.

Software Engineer | Intuit | May 2018 – Sept 2024

- Gathered and analyzed system requirements to build a full stack internal development environment enabling teams to validate data, develop scripts, and test end-to-end workflows with financial partners reducing integration time from multiple months to a few hours.
- Developed, tested, and maintained web-based platforms for data ingestion and migration, implementing automated API and regression testing to ensure secure RESTful integrations and enable 90% of users to transition from legacy screen-scraping systems to validated API based channels.
- Prepared technical specifications, test plans, and documentation while conducting QA reviews and post implementation validation to identify defects and maintain high-quality software delivery.

EDUCATION

Bachelor of Science (BS), Computer Science | California State University, Monterey Bay
